Order Information:

- Model Number: USXPI-Upgrade Kit

TO INCREASE YOUR FILE TRANSFER SPEED BY UP TO 600% AND MAXIMIZE THE PERFORMANCE OF YOUR UNISITE, CHOOSE THE UNISITE-xpi SYSTEM UPGRADE

The UniSite-xpi features all the benefits of the UniSite universal device programmer with the latest performance enhancements. The UniSite-xpi allows you to handle devices that require large data files quickly and easily, and provides other features that make the programmer easier to use in production or engineering environments.

UniSite-xpi Upgrade Features Include:

- The UniSite-xpi downloads data for the newer high capacity devices quickly and easily.
- The new parallel port interface enables data throughput up to 600% faster than before.
- The UniSite-xpi integrates with TaskLink[™] for Windows[®] for improved performance and ease of use.
- Fast algorithm selection and high-capacity local data storage are made available to the UniSite-xpi through the integrated Mass Storage Module. Simply boot the programmer without floppy disks and you are ready to download and program instantly.
- The UniSite-xpi is 100% backwards-compatible with previous pre-compiled Tasklink for Windows Tasks and Kits.
