Quality System (QS) Information

DATA I/O has implemented an ISO9001: 1994 compliant QS, but is not currently registered. DATA I/O's QS addresses the following functional aspects of the organization: Quality, Marketing, Sales, Engineering, Configuration Management, Production, Supply Chain Management, and Service.

Calibration Information

All measurement equipment used in these processes is compliant to ANSI/NCSL Z-540-1994 providing calibrations traceable to national standards (NIST).

Environmental

Although DATA I/O is not ISO14001 registered we actively seek to improve the environment by creating more efficient products, extending the active life-cycles of our products, reducing the energy required to build our products, and recycling as much material as possible.

WEEE-

Data I/O Corporation has already implemented its WEEE compliance program, and all applicable products are marked and documented to support proper collection and processing of expired goods.

RoHS-

DATA I/O products (Test & Measurement) are classified within the WEEE/RoHS category list as monitoring and control instruments (category 9), which are exempt from the restrictions under the scope of the RoHS Directive. This includes manual programmers, automated systems, and their consumables.

Best Regards,

Gordon Bluechel
Vice-President, Operations & Administration
DATA I/O Corporation
