# Safe Harbor

Statements in this presentation concerning economic outlook, expected revenue, expected margins, expected savings, expected results, orders, deliveries, backlog and financial positions, semiconductor chip shortages, supply chain expectations, as well as any other statement that may be construed as a prediction of future performance or events are forward-looking statements which involve known and unknown risks, uncertainties and other factors which may cause actual results to differ materially from those expressed or implied by such statements. Forward-looking statement disclaimers also apply to the global COVID-19 pandemic, including the effects on the Company's business from Shanghai's COVID-19 lockdowns and recovery, impact on the demand for the Company's products, and the Russian invasion of Ukraine including any related international trade restrictions. These factors include uncertainties as to the ability to record revenues based upon the timing of product deliveries, shipping availability, installations and acceptance, accrual of expenses, coronavirus related business interruptions, changes in economic conditions, part shortages and other risks including those described in the Company's filings on Forms 10-K and 10-Q with the Securities and Exchange Commission (SEC), press releases and other communications.

Furthermore, the matters that we discuss today will include forward-looking statements that involve risks factors that could cause Data I/O Corporation's results to differ materially from management's current expectations. We encourage you to review the Safe Harbor statement contained in the earnings releases as well as our most recent SEC filings for a complete description.

Additionally, those forward-looking statements are made as of today, and we take no obligation to update them.

# Supporting the Secure Digital World

We deliver the most secure and efficient systems to deploy firmware, data and secrets into automotive electronics and IoT devices in high volume electronics manufacturing

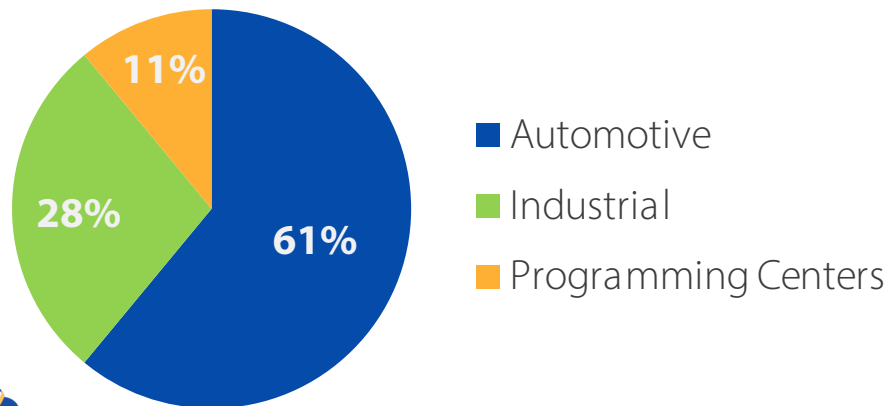

# Serving Customers Globally in Growing Markets

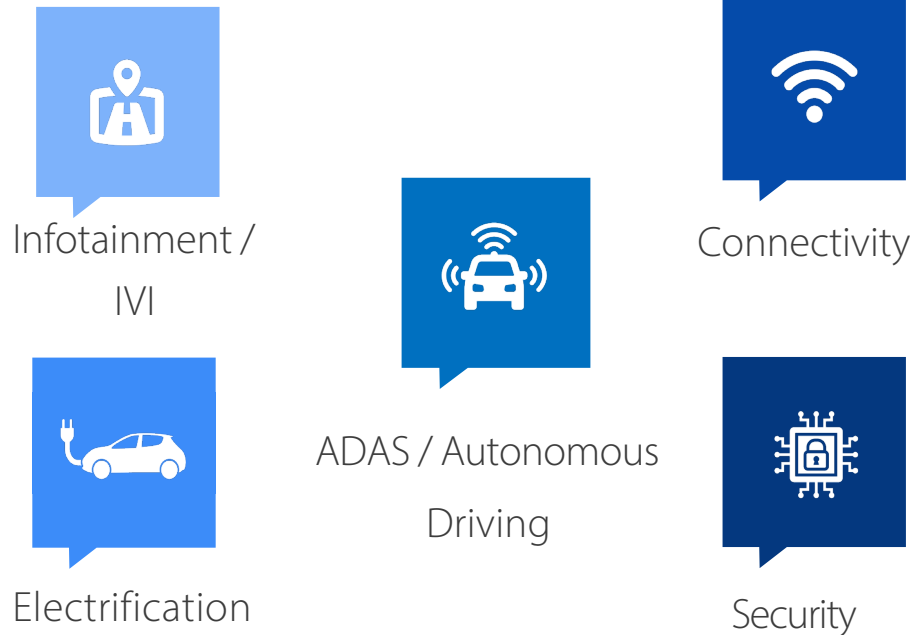

- The largest programming company in the world, 2-3 times larger than the next programming company
- Trusted supplier to 18 of the top 20 automotive electronics suppliers
- 20 or more new customers for 2 consecutive years
- Providing mission critical medical applications for Class I and Class II devices
- Global footprint with headquarters in Redmond, WA, USA and subsidiary offices in Shanghai, China and Munich, Germany

# IoT Device Security by SentiX®

SentiX secures the global electronics supply chain and protects IoT device intellectual property from point of inception to deployment in the field

With more than 20 security patents granted, SentiX from Data I/O offers a unique and highly differentiated approach for a large and fast-growing market addressing unmet cybersecurity concerns

2023 Updates:

- Clients moving in volume production: >100% growth in PPU units in '22
- Noa Leading Co., Ltd offering SentiX® security provisioning services in Japan
- Announced partnership with Nuvoton for new microcontroller family

# OEMs Using Our Security Provisioning Technology

## Electric Vehicle Manufacturer

An electric vehicle manufacturer is using a trusted platform module to secure its supply chain and prevent cloning of its charging network.

## Water Meter OEM

Heated and chilled water metering is being mandated in Germany and requires strong security to protect revenue, secure their supply chain, and meet regulations.

## Logistics Solution Provider

A logistics technology provider uses hardware Roots of Trust to protect user data and maintain privacy.

## Smart Lock Company

Smart locks and the brands of the OEMs manufacturing them depend on robust security and low power consumption found in hardware security-based microcontrollers

## Artificial Intelligence Accelerator Chip Manufacturer

An AI Accelerator Chip is using a trusted platform module to enable robust hardware-based identity.

## Industrial Marking OEM

An industrial marking and traceability solutions OEM protects accessory revenue and enables supply chain integrity with a secure microcontroller.

# Financial Overview

Bringing Devices to Life

# Company Snapshot

## Recent Achievements and Trends

- Global Leader in programming revenue. Over 465 PSV systems sold since inception in 2013 representing over 1.5 billion units/year capacity in the installed base
- Strong momentum in Automotive Electronics for long-term growth
  - 18 of the top 20 Automotive Electronics companies are customers. ~61% of 2022 orders from Automotive Electronics customers
  - Analysts forecast 10-15% CAGR for Automotive Semiconductors through 2030
- Emerging SentiX Security Provisioning Platform; doubling of revenue in 2021 and 2022 with key wins in Automotive, Artificial Intelligence, Intelligent metering

## Committed to Growing Shareholder Value

- Focusing programming core competencies on higher growth, higher margin vertical markets with greater recurring/consumable sales. Target to reach over 50% recurring revenue within 3-5 years
- Differentiated market position through technology leadership and global support.
- Approx. 13% of stock (fully diluted) held or managed by insiders so that management and Board are aligned with shareholders
